

FG Wilson Product Update

Floor Standing Circuit Breakers

Hi

We just wanted to make you aware of the new ABB EMAX 2 range being introduced to replace the existing ACB 1600-4000A floor standing circuit breakers on our Large Product Range (>730 kVA). The new breakers will be introduced to our Larne facility with immediate effect.

Key Features:

- Independently certified to meet IEC61439-2
- IP23 as standard, IP54 upgrade*
- Configurable top and bottom cable entry
- Assembly fault rating of 66kA up to 100kA*

*Requires DTO

The introduction has also given us the opportunity to do a redesign of the breaker housing which complies with the new BS EN61439 switchgear standards.

We are also pleased to be simplifying the circuit breaker upgrades ordering process.

Now when ordering upgrades on your circuit breaker you will no longer need to select a specific PVR but rather order via the standard options selection process.
