

NetBiter® FGW200

Remote management for new and existing generating set installations

NetBiter® FGW200

With software designed exclusively for FG Wilson, the FGW200 offers new opportunities for remote access over the internet and mobile phone. The NetBiter unit is suitable for use in new and existing installations due to control panel Auto Detect software which offers plug and play capability.

Remote Management that takes customer service to a new level by:

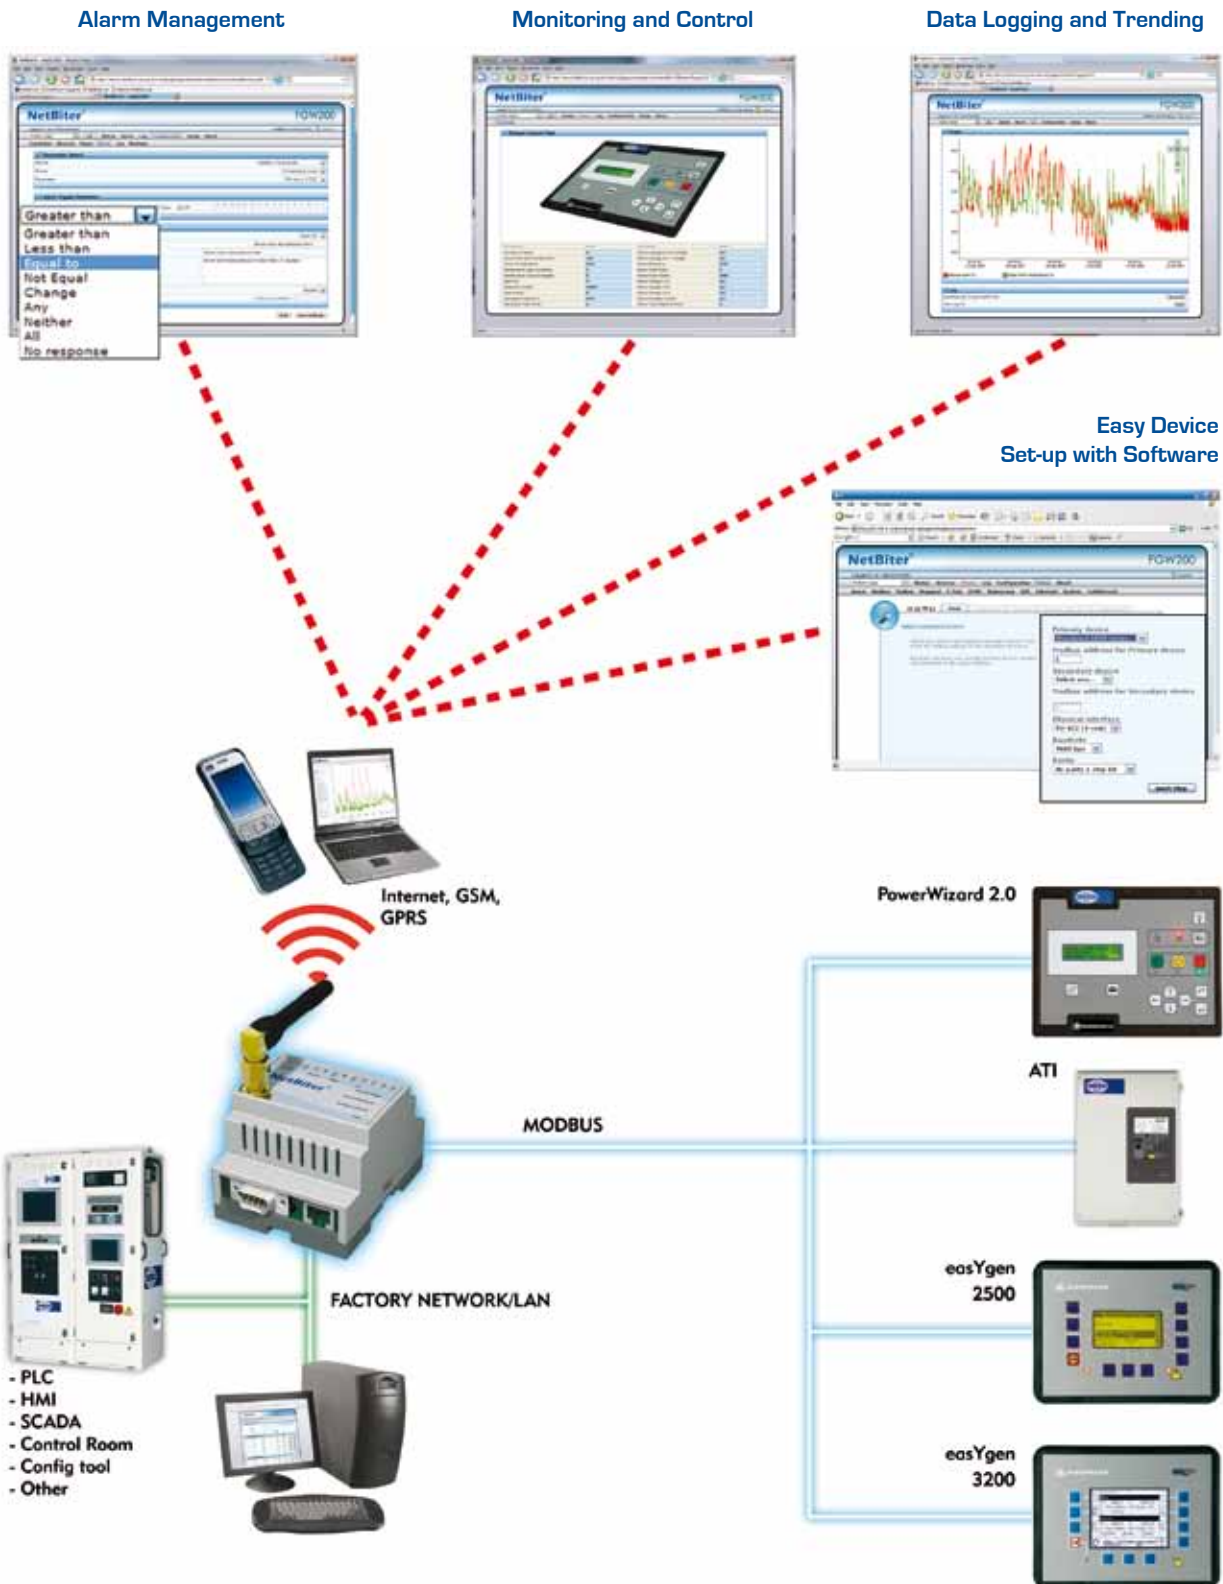

- Reducing the need to travel to remote sites for maintenance purposes
- Minimising downtime with instant information about equipment health
- Theft prevention through generating set tracking
- Fuel level monitoring to optimise fuel inventory
- Start up logging to help prevent generating set misuse
- Allowing multiple project and device management through NetBiter.net

Features

- New Auto Detect software allows retrofit to PowerWizard 2.0, easYgen 2500, easYgen 3200, and ATI transfer panels
- Built in web interface for data monitoring
- Built in alarm manager for SMS, email and SNMP
- Built in data logger of historical trends
- GSM/GPRS modem included
- All software included, easily upgraded remotely and provided with no licensing cost

NetBiter® FGW200 is a remote communication bridge with built in alarm manager, web based data presentation and trend logger.
